# Block practice · Encryption, network security, ethics and new technology

Work through each question type in order. Each section has a worked-example retry and all further practice. Attempt only the part outlined in red.

What encryption is and why we use it

Keeping a network secure: access rights, physical security and authentication

Finding and fixing weaknesses: penetration testing, ethical hacking, code reviews, audit trails

Ethics of technology: privacy, inclusion and professionalism

Emerging tech: quantum, DNA computing, AI and nanotechnology

OLevels.com SCHOOL

# Practice workbook · What encryption is and why we use it

What encryption is and why data is encrypted.

5 question parts: 1 worked-example retry and 4 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

**(1)**

(e) Marie has a mobile phone.

The address of the device is:

2024:0eb8:3c4d:0015:0000:0000:1a2f:1a2b

Describe the relationship between the structure of this address and the total number of bits required to store it.

# 7. Question 4 · part d.ii · 1 mark

2024 JUN · Paper 01

Further practice · Attempt part d.ii only.

**4** Peter and Marie are employees at a research facility.

(a) Peter is creating a predator-prey population simulation of rabbits and foxes.

He creates rules to simulate the movement and feeding patterns for each animal over time.

One benefit of the predator-prey simulation is that it is simpler than monitoring real life animal populations.

Explain **one other** benefit of using this simulation.

**(2)**

(b) Identify the computational model in which several computer systems work together to achieve a goal.

**(1)**

- ☒ **A** Sequential model
- ☒ **B** Parallel model
- ☒ **C** Multi-agent model
- ☒ **D** Input-process-output model

(c) Employees at the research facility use a biometric identifier to login to the network.

Describe **one other** security measure that could be used to ensure that an employee is who they claim to be.
