Type MS · How hard drives, optical discs and SSDs store data

Answer 1 of 5 · Question 2 part b.ii · 3 marks

2024 JUN · Paper 01 · extract 1 of 4 · find part b.ii in this mark scheme extract

2(a)(i)	Award **one** mark for any of the following: • To perform end **user** related tasks (1) • To help the user be more productive/creative/communicative (1)	Do not award trade names or generic categories of software Allow software examples such as word processor if it is clear that it is an end-user task. Do not award responses related to tasks that could be performed by pen/paper.	1
2(a)(ii)	Award **one** mark for any of the following up to a maximum of **three** marks: • Process management (1) • Memory management/virtual memory (1) • File management (1) • Peripheral/hardware management (1) • Network management (1) • Security management (1) • User management (1)	Allow equivalence to management such as 'scheduling processes', 'Virtual memory organisation', but do not award terms in isolation. Do not award marks for types of OS such as multitasking Do not award UI as given in question.	3

Type MS · How hard drives, optical discs and SSDs store data

Answer 1 of 5 · Question 2 part b.ii · 3 marks

2024 JUN · Paper 01 · extract 2 of 4 · find part b.ii in this mark scheme extract

2(b)(i)	Award up to **two** marks for a linked explanation such as: • RAM is volatile/its contents will be lost when the power is switched off (1) ROM (is permanent) is required to store the BIOS/firmware/to boot up the computer (1) • The contents of ROM cannot be changed (1) RAM is required for actively executing programs and data (1)	Both RAM and ROM must be addressed for 2 marks.	2
2(b)(ii)	Award **one** mark for any of the following up to a maximum of **three** marks: • A platter is used (1) • (The platter) is divided into tracks / sectors (1) • A read/write arm/head is moved (to the track required) (1) • A read/write head reads the values (from the surface) (1) • One polarity represents 1 and other polarity represents 0 (1)	Accept North/South for polarity and representation of binary state.	3

Type MS · How hard drives, optical discs and SSDs store data

Answer 1 of 5 · Question 2 part b.ii · 3 marks

2024 JUN · Paper 01 · extract 4 of 4 · find part b.ii in this mark scheme extract

Question Number	Answer	Additional Guidance	Mark

Type MS · How hard drives, optical discs and SSDs store data

Answer 2 of 5 · Question 1 part e · 2 marks

2019 JUN · Paper 01 · extract 1 of 3 · find part e in this mark scheme extract

1(a)	Award **one** from: Input, process, output in this order – **3 marks** Input, process, output in any order – **2 marks** At least one of input, process, output – **1 mark**		3

Question Number	Answer	Additional Guidance	Mark
1(b)	B: Central processing unit **The only correct answer is B** **A** is not correct as this is memory only **C** is not correct as this is memory only **D** is not correct as this is used only for transporting memory addresses		1

Question Number	Answer	Additional Guidance	Mark
1(c)	• Data (1) • Instructions (1)		2

Question Number	Answer	Additional Guidance	Mark
1(d)	Any **two** from: 1. Virtual memory (VM) is used when RAM becomes full (1) (to hold all programs and data). 2. Virtual memory is used as (an extension to) main memory/RAM / works like RAM. (1) 3. Virtual memory is stored/created on (internal) secondary storage/HDD/SSD. (1) 4. Virtual memory is used as temporary storage. (1) 5. Instructions and data not currently being used are transferred from RAM to VM/HDD. (1) 6. When needed again, instructions and data are transferred back to RAM. (1)		2

Type MS · How hard drives, optical discs and SSDs store data

Answer 2 of 5 · Question 1 part e · 2 marks

2019 JUN · Paper 01 · extract 2 of 3 · find part e in this mark scheme extract

Question Number	Answer	Additional Guidance	Mark
1(e)	Any **two** from: 1. The disc surface is made out of polycarbonate. (1) 2. A laser (beam) is used. (1) 3. Data is stored as a series of tiny grooves arranged in tracks on the surface of the disc. (1) 4. Bumps/lands/flats/troughs/pits/dips imprinted/burnt on the disc. (1) 5. Bumps and flats (etc.) represent 1 and 0 (bits) / the reflection (of the laser) represents 1 and 0 (bits). (1)		2

Question Number	Answer	Additional Guidance	Mark
1(f)	D: System software **The only correct answer is D** **A** is not correct because this category is purely for software that is used for security purposes **B** is not correct because this category is designed for end user tasks rather than for managing the computer itself **C** is not correct because this software is used to translate a high level program into machine code		1

Type MS · How hard drives, optical discs and SSDs store data

Answer 2 of 5 · Question 1 part e · 2 marks

2019 JUN · Paper 01 · extract 3 of 3 · find part e in this mark scheme extract

Question Number	Answer	Additional Guidance	Mark

Type MS · How hard drives, optical discs and SSDs store data

Answer 3 of 5 · Question 3 part b.i · 2 marks

2021 JUN · Paper 01 · extract 1 of 2 · find part b.i in this mark scheme extract

Number		Guidance	
3(a)	Award **two** marks for an explanation that includes hardware **and** software. • The laptop is/contains the hardware (1) and the software allows the user to interact with it (1) • Hardware gives input and output devices (1) /memory, storage, cpu, processing ability • Software allows instructions to be passed to the hardware (1) so that it can carry out tasks (1) • Software is the set of instructions (1) that controls the hardware (1)		2

Question Number	Answer	Additional Guidance	Mark
3(b)(i)	Award **two** marks from: • Lighter/thinner (1) • Less heat generated (1) • Faster access speed / faster booting of operating system / faster data transfer/read/write speeds (1) • Silent operation (1) • Less power required / longer battery life (1) • More robust (due to no moving parts) (1)		2
3(b)(ii)	Award **two** marks for a linked explanation such as: • Flash memory is non-volatile (1) whereas RAM is volatile (1) • Flash memory persists even when power is lost (1) whereas RAM clears its data whenever power is lost (1) • Flash memory is used for storage (1) whereas RAM is used in performing operations on data taken from storage (1)		2

Type MS · How hard drives, optical discs and SSDs store data

Answer 3 of 5 · Question 3 part b.i · 2 marks

2021 JUN · Paper 01 · extract 2 of 2 · find part b.i in this mark scheme extract

Question Number	Answer	Additional Guidance	Mark
3(c)	Award **two** marks for a linked explanation such as: • Cache memory stores active/commonly used instructions / cache is a temporary storage (1) and is used to speed up processing. (1) stop data transfer bottlenecks between RAM and CPU (1)		2

Question Number	Answer	Additional Guidance	Mark
3(d)	Award **one** mark for two correct rows. Award **two** marks for four correct rows.		2

Device	Input	Output	Both
Headset			✓
Mouse	✓		
Printer		✓	
Touch screen			✓

Question Number	Answer	Additional Guidance	Mark
3(e)	Award **two** marks from: • Antivirus (1) • Anti-spyware (1) • (Software) firewall (1)	Do not award tradenames	2

Question Number	Answer	Additional Guidance	Mark

Type MS · How hard drives, optical discs and SSDs store data

Answer 4 of 5 · Question 5 part d.i · 2 marks

2022 JUN · Paper 01 · extract 1 of 4 · find part d.i in this mark scheme extract

5(a)(i)	Any **two** from: • It will interpret/analyse patient input to identify symptoms (1) and match the symptoms to (possible) illnesses (1) • It will match symptoms to possible illnesses (1) and give the most likely/probable illness (1) • It will match symptoms to possible illnesses (1) and ask further questions to narrow it down (1) • It will match symptoms to possible illnesses (1) by searching/using a database/other data store (1)		2
5(a)(ii)	Award **one** mark from: 1. May not have access to the internet (1) 2. May not have access to a device (1) 3. May not want to use it (1) 4. May not have the technical knowledge to use it (1) 5. May have a physical disability that stops them from using the service (1) 6. May not want to disclose personal information (1) 7. hacking or security or data issue (1) 8. May not trust the AI/system (1) 9. Can't take physical measurements eg. blood pressure (1) 10. may want a real person (1)		1

Type MS · How hard drives, optical discs and SSDs store data

Answer 4 of 5 · Question 5 part d.i · 2 marks

2022 JUN · Paper 01 · extract 2 of 4 · find part d.i in this mark scheme extract

Question Number	Answer	Additional Guidance	Mark
5(b)(i)	Award **one** mark for: • Local area network / LAN /VLAN		1
5(b)(ii)	Award **one** mark for: • Wide area network / WAN		1

Question Number	Answer	Additional Guidance	Mark
5(c)	**The only correct answer is C** *A is not correct because this is phishing* *B is not correct because this is shoulder surfing* *D is not correct because this is pharming*		1

Type MS · How hard drives, optical discs and SSDs store data

Answer 4 of 5 · Question 5 part d.i · 2 marks

2022 JUN · Paper 01 · extract 3 of 4 · find part d.i in this mark scheme extract

<table>
<tr><th>Question Number</th><th>Answer</th><th>Additional Guidance</th><th>Mark</th></tr>
<tr><td>5(d)(i)</td><td>Award up to two marks for a linked explanation such as:

• Robust/less likely to break it if dropped / quieter than a mechanical hard drive (1) because it doesn't have any moving/mechanical parts (1)
• Smaller/thinner/lighter than a device with HDD (1) so easier to carry/more portable / laptops have less room in them for drives/componants(1)
• SSD uses less power (1) so battery will last longer (1)
• SSD is faster (1) so can access data/records more quickly (1)</td><td></td><td>2</td></tr>
<tr><td>5(d)(ii)</td><td>Any two from:

• Flash memory chips are used (1)
• Chips have (floating gate) transistors/electron pools/charge traps (1)
