Practice workbook · Finish an if/elif/else so each input gives the right message

A given program has an unfinished if statement; the student writes the conditions (relational operators, and/or/not, range boundaries) and branches so each input produces the output in a table or description.

6 question parts: 1 worked-example retry and 5 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.
